

KASUN PURNIMA

Tech Lead / Senior Software Engineer

Auckland, New Zealand | [+64 21 087 25223](tel:+642108725223) | kasunpurnima@outlook.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Tech Lead with 10+ years of experience architecting and delivering scalable enterprise web platforms using Java, Spring Boot, and React across banking, fintech and manufacturing. Hands-on expert in microservices, AWS cloud, and CI/CD pipelines, driving high code quality and continuous delivery. Proven track record of leading cross-functional Agile teams and engaging directly with client technical stakeholders to align technical architecture with business strategy.

SKILLS

Languages	Java (8,17), JavaScript, Typescript
Frameworks	Struts, Spring Boot, Spring MVC, React, NextJs
Architecture	Microservices, REST APIs, SOAP APIs, API Integration, Design Patterns
Cloud/DevOps	AWS, WSO2 MI, Docker, Lambda, Kubernetes, Jenkins, CI/CD
Databases	PostgreSQL, MySQL, Oracle, SQL Server
Monitoring/Tools	Grafana, Nginx, Apache Git, SonarQube, Postman, JMeter, Selenium, SoapUI, Wireshark, Grafana, Datadog
AI & Dev Tools	GitHub Copilot, Claude, IntelliJ IDEA, VS Code

EXPERIENCE

Tech Lead/Senior Software Engineer

N*Able | Colombo, Sri Lanka | Jun 2023 - Mar 2026

Key projects: *BID-eX Business Intelligence Dashboard & E-GLOVE Electrical Glove Scanning Application - for Dipped Products PLC.*

- Led a team of 8 engineers to migration of a legacy VB.NET platform to a Java Spring Boot microservices architecture on Cloud-Native (AWS), modernising the client's core delivery platform.
- Improved code quality through structured review standards, reducing production defects and maintainability.
- Provided technical leadership on new feature development, mentoring junior developers through pair programming and code review.
- Evolved microservices architecture toward an event-driven model, increasing scalability, resilience and service decoupling.
- Collaborated with Product Managers to plan and prioritise sprint work, ensuring alignment with business goals and timely delivery.
- Modernised backend services by solution designing and implementing RESTful APIs using Java Spring Boot, enabling better integration and scalability.
- Leveraged AI-assisted development tools (Claude Code) to accelerate delivery and improve code quality.
- Contributed to the development of data migration DATA services and queries.
- Communicated project progress, risks, and technical updates to stakeholders.

Tech Stack: Java, Spring Boot, Maven, Microservices, AWS (S3, Lambda, CloudWatch, SNS, EKS), JSON, React, NextJs, Amazon MySQL, Elasticsearch, Docker, Kubernetes, DB2, WebSphere (WAS), MS SQL, Ubuntu, SAP S/4HANA

Tech Lead/Senior Software Engineer

OLAK Technologies | Colombo, Sri Lanka | May 2019 - May 2023

Key projects: *Ayurveda Hospital Management System (aHMS), Vendor Management System, Insurance Financial Management Platform, Secure Banking Middleware.*

- System Designed and developed scalable features improving field to office collaboration.
- Provided production support, troubleshooting user issues and ensuring system reliability for system user.

- Conducted structured code reviews and established review standards, ensuring consistency and maintainability across the codebase.
- Communicated project progress & technical updates to stakeholders.
- Improved observability, maintainability, and overall system reliability through enhanced logging, monitoring, and performance tuning.
- Led delivery of critical product features while mentoring junior engineers through pair programming.
- Worked closely with Solution Architects to ensure system designs and implementations aligned with broader architectural strategies.
- Delivered critical features under tight deadlines, including requirement gathering, solution design, and end-to-end implementation.
- Implemented development best practices to improve team productivity and software quality.

Tech Stack: Java, Spring Boot, Maven, JPA, Hibernate, xml marshalling and unmarshalling, React, HTML5, JavaScript (jQuery), Microservice, JSON, Oracle, PostgreSQL, AWS, JIRA, Bitbucket, Cloudflare

Associate/Senior Software Engineer

ASKPI SYSTEM (PVT) Ltd | Colombo, Sri Lanka | Apr 2014 - Apr 2019

Key projects: Retail Middleware (Cargills), Farmer Portal, Remittance Portal (Pan Asia Bank), Washing Plant Management System

- Designed and implemented the Retail Middleware System using WSO2 Enterprise Service Bus (ESB) and backend services, enabling seamless and flexible integration between the POS system and multiple service providers.
- Developed and enhanced core Remittance System using the Spring Framework, ensuring reliable and scalable transaction processing.
- Collaborated within Agile teams to continuously enhance platform capabilities and performance.
- Developed and enhanced a remittance system integrating more than four international providers (Western Union, TerraPay, Small World, Cash Express) for secure international money transfers, for Pan Asia Bank.
- Modernised backend services by designing and implementing RESTful APIs using Java Spring Boot, enabling better integration and scalability.
- Supported configuration, deployment, and disaster recovery (DR) implementation activities.
- Supported API development, performed manual testing, and assisted in front-end development to ensure smooth system functionality.

Tech Stack: Java, Spring, Spring Boot, JPA, Hibernate, Wso2 ESB, JSON, XML, Elasticsearch, JavaScript (jQuery), Bootstrap, Git, GitHub, JIRA, JMeter, Postman, HTML5, MySQL, Tomcat, Linux, Nginx, Apache, MySQL

EDUCATION

- **MBA** - University of Wolverhampton, UK (2021–2023)
- **BSc (Hons) Management Information Systems** - University College Dublin (2010–2014)
- **Higher Diploma in Computer System Design** - National Institute of Business Management -2011
- **Diploma in Computer System Design** - National Institute of Business Management -2010

CERTIFICATIONS

- **WSO2 Certified API Manager Practitioner V4** (Micro Integrator Profile) - Issued Dec 2025
- **Oracle Cloud Infrastructure Foundations 2021 Certified Associate** - Issued Dec 2021
- **Red Hat Certified System Administrator (RHCSA)** - Issued Sep 2015

INTERESTS

Playing Cricket, Travelling, Watching movies and TV series, Volunteering
